Project

Doctor Appointment Booking System

Tech Stack: React.js, Spring Boot, PostgreSQL, Tailwind CSS, REST APIs

<https://doctor-booking-app22.vercel.app/>

- Developed a full-stack doctor appointment booking platform supporting patient registration, doctor listing, and appointment scheduling using React.js and Spring Boot.
- Designed and implemented RESTful API endpoints for appointment booking, cancellation, user management, and payment transaction handling.
- Implemented backend logic to prevent double-booking and ensure data consistency during concurrent appointment requests.
- Implemented user authentication and role-based access control to secure patient and admin portals.
- Designed a PostgreSQL database schema to store and manage appointment records, user profiles, and transactions.
- Integrated email confirmation notifications for successful appointment bookings.

Experience
